DIMENSIONS/TECHNICAL DATA

MODEL# PL1814WH

HELLO AND WELCOME

Hello and welcome to the Fine Fixtures family. You have chosen one of our impeccable Pedestal, and we're excited to get you started on installing it.

Before jumping in, we encourage you to take the time and read these instructions in their entirety. Please also be sure to observe all local plumbing and building codes, and remember that you are installing your sink at your own risk. Fine Fixtures cannot assume any responsibility for damages or personal injury that occur during installation.

BEFORE YOU START

1. Before installation, remove packaging materials and inspect sink for shipping-related damages, Return the sink to its protective carton until you are ready to install it.
2. Check to ensure that none of the pieces required for installation are missing.
3. Do not install if damages are found. Contact Customer Service at 718-602-6060 or at www.finefixtures.com/contact.
4. To avoid personal injury and surface damage, always use assistance when lifting sink.
5. The walls and the floor must be square, plumb, and level. Repair or replace the subfloor if necessary.
6. Your sink may appear different from the one illustrated. The installation steps remain the same.
7. Fine Fixtures, strongly recommends the use 100% silicone sealant as instructed in this installation guide. Other sealants may shrink, separate, and peel over time.

TAKE IN MIND: If you are not familiar with the installation and plumbing, consult a professional to avoid damages.

REMOVE OLD SINK

1. Shut off water supply line. The valves are typically under the sink. If you do not have shut-off valve near the sink shut off main water supply line, Then turn on the faucet to relieve any water pressure left in the lines.
2. Loosen the slip nut at the top of the P-trap. Remove the entire trap if necessary. Have a small bucket ready to catch any water left in the trap.
3. Disconnect the water supply lines. You might need a wrench to loosen them. Again, use a bucket to catch any water left in the lines.
4. Remove the old sink. Clean any remaining debris and wipe any water at the installation area

GOOD TO KNOW: If you're rerouting your plumbing, painting your walls, or installing wall tile, now is the perfect time to do it.

PREPARE THE PLACE

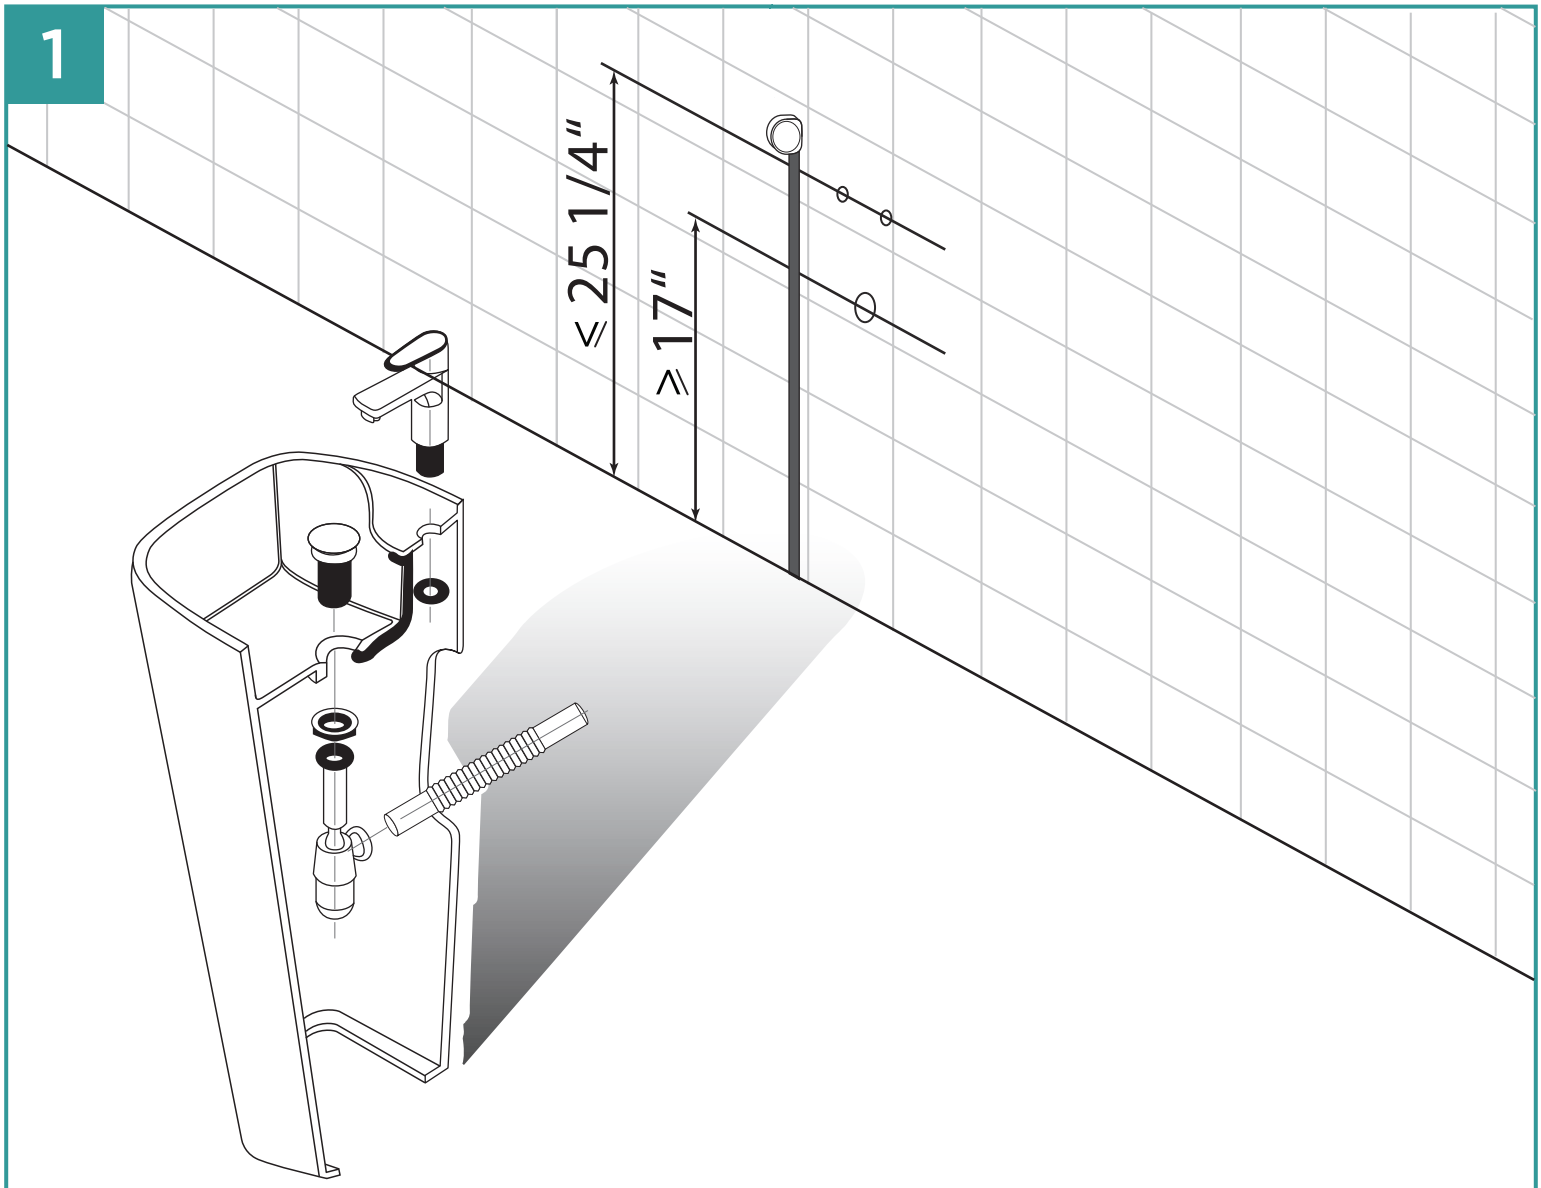

1. Follow all directions for specific steps.
2. Position the pedestal 3" (76.2 mm) away from the wall.
3. Use a pencil to mark the position on the floor.
4. Assemble the faucet and drain on the pedestal before you install it.

INSTALL THE NEW PEDESTAL

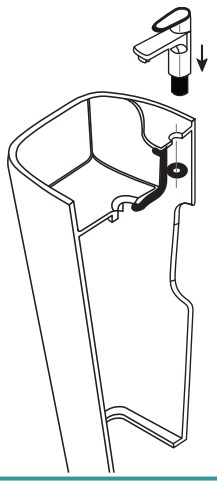

1. Lift and carefully put the pedestal over the marked spot. Once the pedestal is in the position make sure that the bowl is as leveled as possible to have it sealed tight.
2. Do not rock the pedestal back and forth and side to side as it may break or chip.
3. Apply 100% clear silicone sealant around the base.
4. Complete the faucet and drain connections, and run water and check for leaks.

Always Use Soft-Cloth Blanket
