DIMENSIONS/TECHNICAL DATA

MODEL# MTTB20W

ATTENTION! Dimensions may vary by up to 3/8". It is highly recommended to pull all dimensions of actual model for installation and measuring purposes.

1

PREPARE CLOSET FLANGE

- Make sure that rough-in is 12" by measuring the distance from the wall to the center of the closet flange.

2

- Insert 2 floor bolts inside of the toilet flange
- Slide the closet bolts through the holes and align bolts horizontally.

3

INSTALL WAX RING

- Cover the floor with a soft-close blanket.
- Carefully turn the toilet on it's side or upside-down on the blanket with assistance of a second person.
- Install wax ring over the horn discharge located on the bottom of the toilet's bowl.

Note: Ceramic is a fragile material.

- You must always cover the floor with a soft-cloth blanket if you want to put the toilet on the floor on any side other than the bottom of the toilet.
- If you do not cover the floor with a soft-close blanket contact of the toilet with the floor may and will cause minor or moderate scratches on the toilet's surface.

Prior to installtion the wax ring must be kept in a room temperature between 70-75°F.

Always Use Soft-Cloth Blanket

4

INSTALL CLOSET BOLTS

- Once the toilet is leveled install washers and nuts over the closet bolts.
- Tighten nuts.
- Do not overtighten the nuts, It may and will cause damage to the base.

5

INSTALL NEW TOILET

- Lift and carefully put the toilet over the closet flange so the closet bolts can go through the mounting holes in the toilet's base.
- Once the bowl is in the position press the bowl down with slight twisting motion in level position towards the floor.
- Apply your body weight to evenly compress the wax ring to create watertight seal.
- Make sure that the bowl is as leveled as possible to have a nice seal tight.
- Do not rock the toilet back and forth and side to side as it may and will break a seal and you will need to replace the wax ring again and start the installation process over.

6

CONNECT TANK TOILET TO WATER SUPPLY LINE

- Connect the water supply line between the tank and water shut-off valve using a toilet hose.
- When connecting toilet hose tighten coupling nut to the tank by 1/4 turn beyond the hand tight.
- Turn on valve on water supply line and allow tank to fill.
- Check all connections for leakages and tighten as needed.
- Once tank is filled with water flush it 4-5 times to perform a test of the flushing system.
- At the same time check the bottom of the toilet for leaks to make sure that the wax ring is properly installed and sealed.
